AGEING POPULATION

ENGLISH AS A SECOND LANGUAGE

DYSLEXIA

Visual impairments

cognitive Disorders

Reading and Translation Support for the Print Disabled

BrowseAloud Plus is the world's leading reading support solution.

It now includes written and spoken translation and is designed to remove the barriers faced by 46% of the population when transacting online.

These barriers include language difficulties and print disabilities such as dyslexia, mild visual impairments, cognitive disorders and where English is not the native language.

Over 7,000 websites within the public and private sector have chosen BrowseAloud Plus to reach a wider audience, encourage user engagement and improve organisational efficiencies.

Features include:

- High quality voices with written and spoken translations in 33 languages
- Written translations for a further 42 languages
- Text magnification and MP3 generation
- Customisable settings to suit individual needs or preferences

Why choose BrowseAloud Plus

Barrier-Free
- Overcome Online Barriers
- Reach a Wider Audience

BrowseAloud Plus

Settings

BrowseAloud **Plus** reads website content out loud in a high quality, human-sounding voice. Each word is highlighted as it is read aloud and the sentence is highlighted in a contrasting colour. This allows users to easily identify what text is being read aloud and navigate within and between web pages. BrowseAloud Plus is free to website visitors, there's no download and it is really easy to get.

Website Owners

Choose BrowseAloud Plus to:

@ Reach a Wider Audience
